Presents Thibault Roland

<http://www.thibaultroland.com>

The Art of Black and White Photography Friday March 6, 2026 7:30 (eastern time)

Topic

Colors are an essential part of the world. The infinite shades of blues in the sky and the ocean, the delicate greens of vegetation in the Spring time, the gold and reds of foliage in Fall... But what happens when these colors are removed? Suddenly we step away from reality and enter an unfamiliar world where patterns, geometrical shapes and contrasts emerge stronger. During this lecture, Sony Artisan of Imagery Thibault Roland will discuss Black and White Photography. How to create and use leading lines, textures and light in order to build dynamic and original photographs. He will illustrate how important it is to visualize and build an image even before pressing the shutter button, and how your overall photography work (including color) can benefit from the rigorous process of creating in B&W.

Bio

Born in France in 1981, Thibault Roland is a scientist by training and fine art photographer. Thanks to his rigorous background he became a Master of techniques such as long exposure, tilt/shift and infrared photography. He specializes in black and white architecture, minimalism and seascapes. His fine art photographs have been shown, published and awarded internationally and are included in public and private collections such as at the Boston Athenaeum. Previously an instructor at the New England School of Photography, Thibault teaches workshops and gives seminars internationally.

Westchester Photographic Society is proud to invite the public to see Thibault Roland, March 6, 2026 – 7:30 (eastern time). Frequent guests are invited to become members of WPS:
